The quality benchtop team

High Pressure Laminate • Engineered Stone • Solid Surface

Quality, service, value

In 1987 Contour Laminates opened its doors with a staff of six supplying laminate countertops to the kitchen industry. In the ensuing 23 years we have gone from strength to strength, expanding our portfolio of products in line with market trends, investing in cutting edge machinery and implementing training programmes for our team to ensure the highest level of expertise and available technology is employed in the manufacture of your product. Contour Surfaces has grown substantially and many things have changed over the last 23 years. But what remains constant is our commitment to providing our valued clients with quality, value, service and back up that is second to none - and that will never change.

Choosing the right surface

The array of benchtop materials available can be bewildering. Each type of product carries its own design possibilities and aesthetic qualities which should be balanced against the budget available.

Contour Surfaces offers a portfolio of excellent products, backed by reputable suppliers, which will provide the perfect benchtop solution for any project.

No two tops are the same – the team at Contour Surfaces custom manufactures to your specifications or our experienced consultants can advise and guide you through the design process.

From there, you can leave it in our hands to deliver a high quality product solution for your kitchen, bathroom, laundry or commercial project in a timely and cost effective manner.

What product is right for me?

High Pressure Laminate

High Pressure Laminate or HPL is made from several layers of resin impregnated paper with a decorative overlay that forms the colour/pattern. These laminates are typically pressed onto particle board or MDF substrates to form the benchtop surface.

Engineered Stone

Engineered Stone is comprised of approximately 95% quartz and 5% resin. The sheets are available in a vast range of high fashion colours and are fabricated into eye catching surfaces which are timeless, durable and a practical choice for domestic and commercial applications.

Solid Surface

Solid Surface products are typically comprised of a blend of natural minerals and acrylic resins. The tops are fabricated from sheets to form flowing, seamless shapes which have extraordinary durability and timeless beauty.

Product comparison summary

High Pressure Laminate

Laminate remains the most common and most economical material for benchtop surfaces in New Zealand. Most people refer to High Pressure Laminate as Formica, which first appeared in the decorative benchtop market during the 1950's. Many brands have subsequently emerged over the last 60 years providing a vast choice of colours, patterns and finishes.

Contour Surfaces offers you a choice of 8 brands which are backed by our 6 year extended warranty.

Features and benefits:

- ✓ Kitchen, bathroom, laundry, marine interiors, campervan tops, tables, cupboards, furniture and commercial fitouts
- ✓ Large range of colours and patterns
- ✓ 3 choices of finish – matt, textured and gloss
- ✓ Most economical benchtop solution
- ✓ Range of profiles and thicknesses available
- ✓ Non-porous, stain resistant and easy to maintain
- ✓ Provides medium durability and heat resistance
- ✓ Stainless steel bowls/drainers can be undermounted

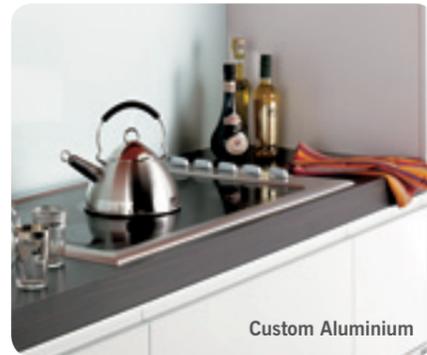

Edge Profiles

In response to the current trend towards square, clean edges, Contour Surfaces has invested in the latest forming technology. Our specialised machinery has the capability of producing the popular tight radius, round/flat/round edge with a selection of laminates as well as the many standard profiles available in the marketplace. The following examples are the most common:

Profile	Description	Antispill	Thickness (mm)
	Square	✓	any
	Round/Flat/Round (RFR) Radius = 9,12mm	✓	36,50,60
	Tight Form (TF6) Radius = 6mm	✗	36,50,60
	Freeform 180° (FF180)	✓	26,31,36,50
	Freeform 90° (FF90) Radius = 9,12mm	✗	26,31,36,50,60
	Timber Edge (TE) (specify type & profile)	✓	26,31,36,50
	Sharknose (SN)	✗	36,50,60
	Coved Upstand	N/A	Specify overall height
	Custom Edge Eg. Aluminium	✗	Specify

Engineered Stone

Engineered Stone is a man made rework of natural quartz bound together with a small percentage of resin to create a much larger variety of colours than is available in natural stones. Often the sheets contain additives such as mirror, glass or shell to enhance the visual impact and to create that point of difference.

A combination of style, strength, durability and practicality makes Engineered Stone an increasingly popular choice for those looking to make a statement anywhere in the home or on a commercial project.

Features and benefits:

- ✓ Kitchen, bathroom, laundry, wall panelling, table tops, commercial fitouts
- ✓ Excellent colour range
- ✓ Uniformity of colour and pattern across the slab
- ✓ Non porous – no sealing required
- ✓ Very durable
- ✓ Easy to maintain
- ✓ Scratch and stain resistant
- ✓ High heat resistance
- ✓ Resistant to most household chemicals and acids

Joins

Engineered Stones are typically constructed using a vee join 1-2mm wide on all changes of direction. The joins are colour tinted to blend in with the sheet colour and are easy to keep clean.

Edge profiles

The majority of engineered stone which we use is sold as a 20mm slab. The edge can be finished at 20mm providing a particularly cost effective option. If you require edges greater than 20mm they can be mitred as per the table below with top and bottom edges using a 3mm radius.

Product	Engineered Stone thickness (mm)												
	12	20	32	36	37	39	41	42	50	51	52	59	60
Caesarstone	-	✓	-	-	-	✓	-	-	-	✓	-	-	✓
Silestone	✓	✓	-	-	-	✓	-	-	-	✓	-	-	✓
Quantum Quartz	-	✓	-	-	-	✓	-	-	-	✓	-	-	✓

Solid Surface

Our portfolio of solid surface products offers sophistication, versatility and freedom of design for both residential and commercial projects - the design is limited only by the imagination.

A variety of widths and shapes are able to be joined invisibly creating seamless work surfaces and splashbacks allowing for tops of any length to be manufactured. Joins are hygienic and 100% waterproof. The option of dished or grooved drainage to sink areas completes this modern, clean image.

The surface can be finished in either: • **Matt** • **Semi-gloss** • **Gloss**

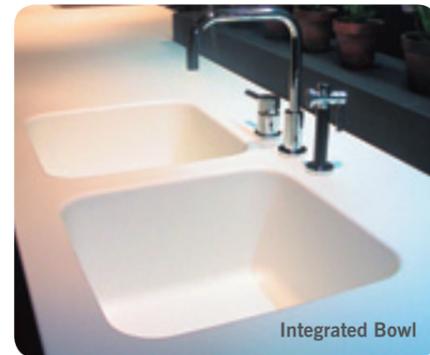

The majority of high wear surfaces are completed in semi-gloss. This allows the use of liquid abrasive cleaners to maintain a uniform surface in addition to removing light scratch marks.

Features and benefits:

- ✓ Kitchen, bathroom, laundry, marine interiors, campervan tops, panelling, table tops, furniture, commercial fitouts
- ✓ Large variety of colours and patterns
- ✓ Versatile – offers limitless design possibilities
- ✓ Seamless elegance to edges, joins, upstands and bowls
- ✓ Very durable- the surface can be refinished to look like new after many years of service
- ✓ Non-porous and hygienic surface
- ✓ Easy to maintain
- ✓ Scratch resistant
- ✓ Able to be repaired and refinished if scratched or chipped
- ✓ Integrated bowls and draining areas available

Replacement & Installation Service

From site measure to templating to removal of existing and installation of the new – Contour Surfaces assumes responsibility for a perfect fit by carrying out the work in a highly professional and timely manner. We can also arrange the plumbing, electrical and gasfitting in partnership with our preferred and trusted suppliers.

Benchtop replacements are generally carried out within one working day with a minimum of fuss and disruption to family life.

This installation service or parts thereof are available across the full range of products featured in this catalogue.

Other products and services

Insurance Work

Damaged your existing work surface? Contact us to arrange a site inspection to determine if a satisfactory repair can be undertaken. If this is not possible, Contour Surfaces will provide your insurers with a cost effective quotation for replacement.

Sink Bowls & Basins

Contour Surfaces supplies all leading brands at competitive prices or we can fit client supplied units. Both overmount and undermount fitting is available.

Taps & Wastemasters

We offer supply and installation of Aquatica brand tapware and insinkerators. Aquatica is a NZ company which provides excellent after sales back up on all their product.

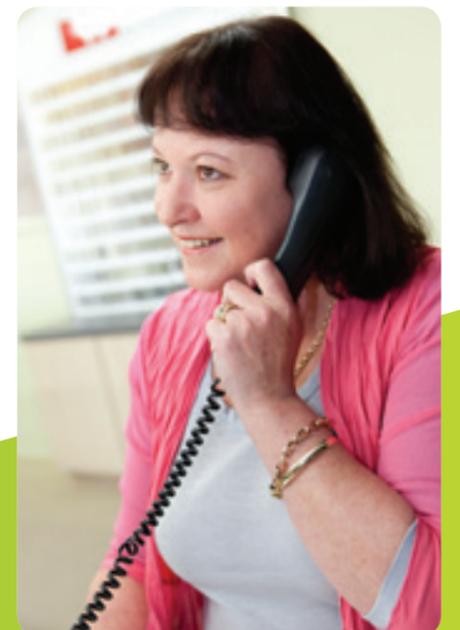

Quality, service, value

Order your new benchtop today.
